Subject: Re: Water level for clove oil solution

Dear Kak Mahirah,

Below is the updated details regarding the water volume and PE tanks as per requested.

Type of container	Volume of water for clove oil solution
Small basin	1 litre
Small pail	1 litre
Medium pail	6 litre
Large pail	12 litre
Plastic aquarium	36 litre
Small PE tank (Bumi 25/50)	126 litre
Big PE tank (Bumi 70/100)	

Thanks,
Solehah

Subject: Water level for clove oil solution

Dear Kak Mahirah,

Below are the details regarding the water volume for each container in the hatchery. Solehah and me measured the maximum volume suitable for the preparation. We also already marked the containers with labels (1. water level labels & 2. containers for clove oil sol. labels) as per discussed.

Type of container	Volume of water for clove oil solution
Small basin	1 litre
Small pail	1 litre
Medium pail	6 litre

Large pail	12 litre
Plastic aquarium	36 litre
Small HDPE tank	
Big HDPE tank	126 litre

We are not very sure about small HDPE tank. My apologies.

[@Hashim, Solehah \(WorldFish\)](#) will take care of this part by tomorrow and update with you.

Thanks and regards,

Atikah
