FISH TRAP, PLASTIC

This trap has a longer life than comparable metal traps in alkaline, brackish and salt water because it is all plastic with no sharp edges. The two halves hinge together. 7/8" (22 mm) diameter entrance hole.

MODEL		DIAMETER (WIDEST)	LENGTH	MESH	EACH	12+
MT1	FISH TRAP (FOR MINNOW-SIZED FISH)	9"	17"	3/16"	\$9.69	\$8.72

FISH TRAP, GALVANIZED WITH VINYL COATING

Similar to our galvanized **MT2-AQ** fish traps, the Minnow-Napper features a vinyl coating. Optional extender extends the total length of the trap to 31".

MODEL		DIAMETER (WIDEST)	LENGTH	MESH	EACH	
MT13	MINNOW-NAPPER	9"	16"	1/4"	\$13.59	\$12.23/6+
MT13E	OPTIONAL EXTENDER	9"	15"	1/4"	13.59	12.23/4+

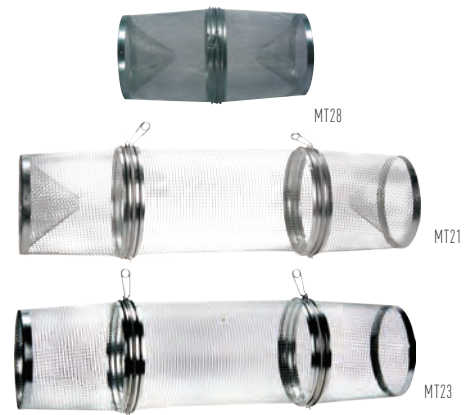

FISH TRAPS, GALVANIZED

These fish traps have a 7/8" (22 mm) diameter entrance hole. The **MT2-AQ** traps minnow size fish and the **MT28** is for smaller fish.

The **MT21** has a removable 15" center piece, making it ideal for large minnows and eels. The crawfish trap (**MT22**) is similar to our **MT2-AQ** minnow traps; however, the entrance hole is enlarged to 2 1/4" diameter.

The minnow keeper (**MT23**) is a small cage that is similar in design to the **MT2-AQ**; however, it has flat ends to keep aquatic animals in their environment. Ship weight is 2 lbs each.

MODEL		DIAMETER WIDEST	LENGTH	MESH	EACH	
MT28	FISH TRAP (FOR SMALLER-SIZED FISH)	9"	16"	1/8"	\$34.49	\$31.04/6+
MT2-AQ	FISH TRAP (FOR MINNOW-SIZED FISH)	9"	16"	1/4"	16.39	14.75/6+
MT21	EEL TRAP (FOR LARGE MINNOWS & EELS)	9"	31"	1/4"	26.99	24.29/4+
MT22	CRAWFISH TRAP	9"	31"	1/4"	27.09	24.38/4+
MT23	MINNOW KEEPER	9"	31"	1/4"	26.99	24.29/4+

SPAT BAGS

These bags are very commonly used for collecting scallop larvae and as oyster nursery bags. They have knitted polyethylene mesh with a drawstring. **SCB4** is used in heavy fouling conditions.

MODEL	MESH (MM)	LENGTH	WIDTH	EACH	12+
SCB1	0.75	31 1/2"	15 3/4"	\$6.79	\$6.45
SCB2	1.5	31 1/2"	15 3/4"	4.79	4.55
SCB3	3.0	31 1/2"	15 3/4"	4.39	4.17
SCB4	2 X 7	31 1/2"	15 3/4"	3.69	3.51

FISH BASKET

This durable basket has multiple aquaculture applications. Its thicker bottom (with drain holes), tapered form and molded-in handles give it superior strength and durability. Rated at 40 lbs (18 kg) carrying strength but will physically hold 75-80 lbs when stationary. Nestable. Ships Oversize with up to 10 baskets in one carton.

MODEL	DIAMETER (TOP)	HEIGHT	HOLE DIAMETER	SHIP WT (LBS)	EACH
FBK3	19"	17"	3/4"	3.5	\$26.19

PLASTIC MESH

High-quality, extruded plastic netting is offered in both square and diamond configurations for a wide variety of aquaculture applications. Made from a pliable, yet durable semirigid polyethylene that is great for outdoor use. All screening is nontoxic.

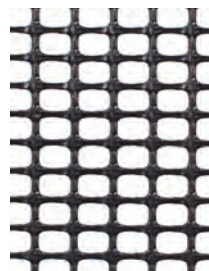

This netting is characterized by a smooth surface and heavy-duty construction. The surface minimizes algae growth, making cleaning easier and less frequent. The products are made with more weight than many competitive netting products, providing for greater durability and longer life. And the material is produced to high quality standards for consistency, uniformity and flatness—making fabrication into cages, traps and trays all the easier. Sold by the roll.

MODEL	MESH SIZE	WIDTH X LENGTH	MESH SHAPE	MESH OPENING*	WEIGHT PER ROLL	EACH
N1130	1/8"	36" X 50'	DIAMOND	5/32" (4.0 MM)	6 LBS	\$84.79

◀ GALVANIZED WIRE MESH, PLASTIC-COATED

Use this PVC-coated wire so you won't have to build another cage for a long time. For a strong and long-lasting cage, trap or net material, you won't find a finer product. The smooth, fuse-bonded PVC coating adheres tightly to the galvanized steel wire, providing durable strength and corrosion resistance. We offer the most popular size of high-tensile strength wire material. Gauges measured before plastic coating (other widths and sizes are available, please call). Must be shipped via motor freight. FOB manufacturer. Sold by the roll.

MODEL	MESH SIZE	WIDTH X LENGTH	GAUGE	SHIP WT (LBS)	EACH

TECH TALK 107

Getting Started in Aquaculture

How Do I Get into the Aquaculture Business?

By coming up with a business plan that can't fail and having a lot of money, skill, patience and energy. As you know, most new businesses don't make it. Aquaculture businesses are especially difficult because of the slim margins, burdensome government regulations, lengthy start-up time, live animal constraints, diseases, power outages, unreliable vendors and fluctuating market prices.

A beginner in aquaculture must first learn as much as possible about the needs of the species to be cultured. Use books, videos, publications, extension agents, schools and especially other people in the same business. Only if you think of a way to make a lot of money should you go to the next step, which is doing a detailed business plan. After you have included everything you can think of, have the plan carefully scrutinized by a minimum of three businessmen who are knowledgeable in that type of business. Do not dismiss their objections!

Here are some things to address in your business plan specific to aquaculture:

- Lack of funding is the number one cause of business failure. This applies to aquaculture.
- Time and expense to meet government regulations before even beginning.
- Site selection. Don't try to make a bad location work.
- Include cost for crop insurance, if available.
- Consider starting small, even at the hobby level, to learn all husbandry aspects, growth rates, costs, etc., and to get a feel for marketing.
- Consider niche businesses that do not sell product at commodity prices but rather specialty or value-added products at higher prices.

If you do come up with a plan that shows the business can be highly profitable, you can only proceed if you will have enough money to operate the business with zero income until after the first successful crop has been sold and paid for ... and that could be a long time.

This is not a pessimistic view of the aquaculture business but rather a realistic one. Don't become a statistic; only start a for-profit business if your business plan is rock solid and you really love the business.

Various species can be grown for profit.

An example of a small commercial hatchery.
Please see the Index for our complete selection of fish farming products.

FISH CAGES

If you need cages for fish inspection, introducing small fish into a pond with larger fish or to keep different sizes of fish separated, try these. Made of 1/4" polyester netting with a 3/4" PVC top frame, floating lid and aluminum bottom frame.

MODEL	L X W X H	SHIP WT (LBS)	EACH
C23	2' X 3' X 2'	10	115.29
C33	3' X 3' X 2'	15	130.59
C43	4' X 3' X 2'	20	146.39

CAGE FITTINGS, PVC

Special, hard-to-find PVC fittings for the construction of floating cages, framework, etc. Use inner caps to seal off air-filled sections from water-filled sections. Available in 1/2", 1", 1 1/4" and 1 1/2" sizes. Three-way, 4-way and 5-way cross compatible with standard Schedule 40 PVC and Schedule 160 PVC. Inner caps compatible with Schedule 40 PVC pipe and all fittings. Head of cap fits inside fittings. Skirt of cap fits inside Schedule 40 pipe. UV-resistant.

NET STAND

This all-plastic storage stand is better than wood, unaffected by water and easy to clean. It is sturdy, lightweight and requires minimal floor space. Stand holds up to 24 nets with handles up to 1 3/8" in diameter.

MODEL	L	W	H	SHIP WT (LBS)	EACH
N0071	18"	18"	18"	7.5	\$39.29

NET SOAK®

This net soaking compound will keep net fabric soft, resulting in less stress on the fish. Concentrated: use 2 oz. for 10 gallons of water (1.5 mL per liter).

MODEL	EACH
NS128	\$78.39

Net Soak® is a registered trademark of United Pet Group, Inc.

ECONOMICAL KOI NETS WITH TELESCOPIC HANDLES

These koi nets are good-quality, lightweight nets at an economical price. The two-piece, aluminum telescoping handle comes with a soft, black mesh net. The long-reach handles are perfect for herding and catching fish up to 3 feet. These are lighter-duty versions of our K08 Deluxe Koi Net with Telescopic Handle.

MODEL	FRAME SIZE	NET DEPTH	MESH	HANDLE LENGTH	HANDLE DIAMETER	SHIP WT (LBS)	EACH

SMALL KOI NET

This small net is designed for catching small- to medium-size koi and goldfish. Measures 11.5" across end, 12" from end to handle; has 13" long aluminum handle with rubberized grip. 6" bag depth, 1/8" soft black mesh. 2" rope loop for hanging on end of handle. Skimmer net has micron netting with extra deep bag.

MODEL	FRAME SIZE	HANDLE LENGTH	MESH	BAG DEPTH	SHIP WT (LBS)	EACH
PT811	12"x12"x11 1/2"	13"	1/8"	6"	0.3	\$12.79

DELUXE KOI NET WITH TELESCOPIC HANDLE

This net has polyester mesh coated to resist barb penetration and scaling. Shallow bag depth allows easy access. A net guard surrounds the aluminum frame to prevent fish abrasion. Telescopic aluminum handle (included).

MODEL	FRAME SIZE	HANDLE LENGTH	MESH	BAG DEPTH	SHIP WT (LBS)	EACH
K08	25" DIA.	4-8'	3/8"	6"	4	\$123.89

KOI SOCK NETS

Sock nets are a "must have" net for koi keepers. We have both the net and water-holding socks. Each has an aluminum frame and wooden handle. The **KS45** has a very fine mesh that will allow water to pass through. The **KS44** is a much tighter weave, very soft and will not pass water quickly (not watertight). After netting the fish, pinch the mesh end closed and the fish are held within a sock of water, which is much easier on them.

MODEL	FRAME SIZE	HANDLE LENGTH	SOCK LENGTH	SHIP WT (LBS)	EACH

KS45	12" DIA.	12"	40"	2.5	44.99

TECH TALK 16

Fish Metabolism

We refer to fish as being "cold blooded", that doesn't mean they don't give off heat. There is 'heat of metabolism', or heat that is generated as fish metabolize feed in a system. It works as follows:

- 100 pounds of fish fed @ 5 percent of weight per day.
- 5 pounds of feed x 700 kcal/lb feed = 3,500 kcal/day.
- 3,500 kcal/day = heat that would raise a 400-gallon culture tank's temperature [perfectly insulated] 2-3°C.

This explains how fish metabolism, together with pumps, lights, etc., is responsible for raising the temperature.

◀ FRY, FINGERLING AND BAIT NETS

These nets are excellent for handling small fish. Each net has an all-wood handle (great for cold weather) with a heavy-duty, galvanized steel frame. Steel net guards are standard on the front of each (except the skimming net **DN29**). All mesh is knotless nylon. Replacement bags are not available.

HEAVY-DUTY HARVESTING NETS

These nets are heavy nets for heavy loads. They'll carry up to 100 lbs! A hand grip at the frame throat makes lifting heavy loads easier. **DN11** and **DN12** are generally preferred for catfish and **DN13** for fish with scales. Painted steel frame with galvanized steel handles. The nets ship Oversize at the 30-lb rate, so four can ship for the same price as one.

LANDING NET

Excellent for landing fish at fee fishing operations. 1-1/8" diameter aluminum handle. Shipped in two boxes.

Plankton Nets can be found on Pg. 397

MONORAIL NETS WITH ALUMINUM HANDLES

These nets do not need any edge protection because their unique monorail frame is a natural guard. The frame is made of lightweight, yet strong, extruded aluminum. Bag replacement is simple. These nets have 1" aluminum handles (also see nets w/fiberglass handles). Nets with 36" handles and larger ship Oversize/Exposed and up to six nets can be packaged together to save shipping costs.

Note: **MH516P** and **MH54P** have the same dimensions as **MH516** and **MH54** but have pool quick connects to fit pool style handles.

MONORAIL NETS WITH FIBERGLASS HANDLES

These nets feature 1" diameter fiberglass handles. They are popular with Fish and Game Commissions, hatcheries and universities. Handles are capped on the net end and have a 5" foam grip on the other. Handles are easily removed with a pushbutton. Replacement bags available below.

MODEL	FRAME SIZE	HANDLE LENGTH	MESH	BAG DEPTH	SHIP WT (LBS)	EACH	4+

MONORAIL NET

The Handler has Ace nylon mesh with aluminum handle and sponge end. Well suited for handling most medium-size fish.

MODEL	FRAME SIZE	HANDLE LENGTH	MESH	BAG DEPTH	SHIP WT (LBS)	EACH	4+
KN164	16" X 16"	4'	1/4"	4"	2	\$28.09	\$25.28

THE MONORAIL SYSTEM

Features an extruded aluminum net frame which encases the net, guarding it from abrasion. It makes a smooth, strong, attractive net, and replacing the net bag is simple. All nets are 100% nylon knotless weave, which reduces abrasion to the fish.

MONORAIL NETS, TANGLE-FREE

These monorail nets are coated to eliminate hang-ups of fish barbs. The nets are not replaceable, but the coating will increase net life dramatically.

MODEL	FRAME SIZE	HANDLE LENGTH	MESH	BAG DEPTH	SHIP WT (LBS)	EACH	4+

SEINES, SMALL

These small-mesh, commercial-grade seines are ideal for gathering fish in tanks and small ponds. They are made of white knotless nylon. Complete with sponge floats for top and weighted bottom line. Seine handles not included.

MODEL	H X L	MESH SIZE	MATERIAL	SHIP WT (LBS)	EACH
ML210	4' X 10'	3/16"	NYLON	3	\$69.99
ML520	6' X 20'	3/16"	NYLON	6	175.99

SEINES, HEAVY-DUTY

These seines will stand up to the rigors of daily commercial use. Foam floats are sewn on 12" centers along the 3/8" braided float line. A braided lead line with internal leads (.16 lbs/ft), plus 4-oz external leads over the lead line on 8" centers, holds nicely to the bottom. Knotless nylon mesh.

MODEL	H X L	MESH SIZE	MATERIAL	SHIP WT (LBS)	EACH
HDS1	4' X 10'	1/8"	NYLON	16	\$203.69
HDS5	4' X 10'	3/8"	NYLON	11.6	211.09
HDS2	7' X 20'	1/8"	NYLON	25	475.89
HDS6	8' X 20'	3/8"	NYLON	24	478.39

SEINES, LIGHT-DUTY

These seines are made of square mesh nylon netting that travels through the water easily. They are offered in mesh sizes small enough to net even two-week-old koi fry (1/8"). Seines include floats and lead weighted bottoms.

MODEL	H X L	MESH SIZE	MATERIAL	SHIP WT (LBS)	EACH
LDS1	8' X 20'	1/8"	NYLON	5	\$166.49
LDS2	8' X 20'	1/4"	NYLON	4	126.69
LDS3	8' X 40'	1/8"	NYLON	12	347.69
LDS4	8' X 40'	1/4"	NYLON	8	240.99

NET MENDING TOOLS

No. 12 nylon twine has 90-lb strength and No. 21 twine has 192-lb strength.

MODEL	EACH
TW21 NO. 21 WHITE BRAIDED, 740'/LB	\$18.59/lb
TW12 NO. 12 WHITE BRAIDED, 1,900'/LB	20.69/lb
NT6 6" STEEL BENT NEEDLE	3.69
NT8 3/8" X 8" NYLON NEEDLE	4.19

FT3X5B/W

NET FLOATS

Rigid polyethylene floats are UV-resistant and extremely durable. They are ideal for use with seines, nets and traps.

MODEL	L	DIA.	HOLE SIZE	COLOR	EACH
FT3X5B/W	5"	3"	1/2"	BLUE/WHITE	\$2.59
FT5X9B/W	9"	5"	3/4"	BLUE/WHITE	4.69

NET FLOATS

Made of ethylene vinyl acetate copolymer (EVA), which offers high tensile strength; durability; resistance to pressure, sunlight and abrasion; buoyancy; and a much longer life expectancy than PVC net floats.

Each Evafloat has internal nylon grommets and will give years of worry-free service as your seine float, rope barrier or marker buoy.

MODEL	L	DIA.	HOLE SIZE	COLOR	FLOATATION (OZ)	EACH
NF4	5"	3 1/2"	5/8"	WHITE	17	\$2.39
NF5	6"	3 1/16"	5/8"	WHITE	23	2.59
NF6	5"	4 3/8"	1"	WHITE	32	4.99

NF4

NF6

CN4

CAST NETS

Monofilament cast nets are useful for sampling ponds and tanks and are convenient for partial harvesting of fish as small as 4" long. These economical nets come with a 20' long polyester rope. Mesh size is 3/8" [9.6 mm] and stretches to 7/8" [23 mm].

MODEL	DIA	SHIP WT (LBS)	EACH
CN4	8'	4	\$45.49
CN5	10'	5	55.49
CN7	14'	9	74.79
CN8	16'	10	93.89

NYLON NETTING, KNOTLESS

Ace mesh netting is strong, nonabrasive and will not scale the fish. It is ideal for minnows, fry and other fish that are easily damaged.

This material is excellent for bait bags, dip nets, bait nets, holding pens or any other application where a strong, soft, small mesh is required. Will not rot or mildew, can be stored wet. The netting is 4' wide and sold by the running yard (1 running yard = 12 sq.ft.).

MODEL	MESH	WIDTH	LENGTH	EACH	5+
NA2	1/8"	4'	1 YD	\$9.09	\$8.18
